Proofs \$45.00 each. Duraflex (plastic based material) add 30% to print price.

File preparation, computer time \$125 per hour.

We are ICC Colour Managed.

Large quantity discounts, please call for quote.

PDF files must be saved as high res with fonts embedded if to be used as artwork.

Tiff files are preferred with no extra channels, paths or masks.

Placed images in postscript files (Illustrator / Quark) should be in tiff or eps, in RGB format.

Scanned images should be at 150dpi at output size.

Inkjet

Inkjet Prints

High Quality 720dpi prints, max width 2500mm by any length. Files set @ 100 dpi at final output size, saved as CMYK format. Lamination recommended for non-solvent inks.

Prices are for paper prints from print-ready digital files. We can also print to vinyl, plastic, canvas, and many other materials, call our sales team to discuss. Please specify colour space or profile for accurate colour output.

If vinyl is to be wrapped around edges of board please include appropriate bleed in artwork.

Normal Service 2 days, VIP service add 50%. All prices exclude GST

Portable Displays

We have an extensive choice in portable displays, suitable for trade shows, exhibitions, showrooms and marketing. Popular products include Banner and Pop-Up display systems, as well as custom built displays. Call our sales team for options and prices.

For details of Pop-Up Display, Quick Roll-Up, Roll-Up Display and Banner-Up check out our website www.matrixdigital.com.au and follow links to Portable Displays.

Large Format Outdoor

Outdoor Banners.

Wide variety of cloth and vinyl for outdoor or shopping centre use. Solvent inks to a variety of vinyl finishes to suit every requirement and budget, at up to 720 dpi. Available in a range of finishing.

Window Adhesive Vinyl.

Window graphics can be produced on clear, translucent or white self adhesive vinyl, perfect for adhesion either inside or outside of glass.

Skins for Lightboxes.

For large lightboxes that are too big for Duratrans we can print solvent ink to backlight vinyl at 720 dpi. These would generally have rope edging for installation but we can finish to suit. Please specify.

Finishing for Banners.

We can support most installation systems and can also do special requirements. Generally we finish in one of these ways, or a combination of:

Eyelets: Fixing brass eyelets as required.

Air Vents: We can cut half-moon air vent as required.

Welded Edges: Edges folded over and heat weld.

Webbing: For extra strong finish we can heat weld nylon webbing into the edges.

Rope Edging: Sewing rope onto the edge for either sailtrack fixing or lightbox.

Tape Edging: Double sided tape on edges for indoor or short term use.

Pockets and Poles: Pockets can be added to top and bottom of hanging banners for timber or aluminium poles.

Raw Edging: Graphic trimmed to edges for nice clean edges when good looks are paramount.

Print Finishing

Mounting and Lamination

Ideal for exhibition, museum and display. Normal Service 2 days, VIP service add 50%. All prices exclude GST
